## **kood/Jõhvi is looking for Technical Tutors!**

We are looking for new team members with a technical background to help us change the education landscape of Estonia! The role of the technical tutor is to develop the study program modules and additional events together with our partners and support the students.

### **Duties and responsibilities:**

- Understand the 01 Education System curriculum and content, make decisions regarding pedagogical tech content and know the platform inside and out.
- Perform audits of student work during the test period.
- Communicate with students during sprint and study period and answer their questions.
- Be able to identify platform bugs and communicate with the 01 tech team.
- Have credibility with corporate partners (ex. understand technical inputs for a hackathon).
- Support the organization of tech events and collaborations.
- Query the database to perform analytics and extract insights.

### **Required skills:**

- Have a computer science background, experience with multiple programming languages and feels comfortable learning new languages (such as Go).
- Ability to quickly learn new or unfamiliar technology and products using documentation and internet resources.
- Ability to work with all levels of staff within and outside of IT and outside the organization.
- Good analytical and problem-solving skills.
- Great communication and teamwork skills.
- Good knowledge of English language, either Estonian or Russian on a communication level is necessary.

The role requires you to be located in Ida-Virumaa, Estonia.

**Send us your CV/Linkedin and motivation letter by May 9 to [info@kood.tech](mailto:info@kood.tech)!**
